

EEZY TRADER TERMS AND CONDITIONS ON THE COINGARAGE PLATFORM

These Terms and Conditions apply to the EEZY Trader service on the Coingarage platform, which is accessible via the website located at <https://coingarage.io>. and the Coingarage mobile app, and these Terms and Conditions constitute separate terms and conditions governing the obligations arising from the provision of the EEZY Trader service, over and above the General Terms and Conditions or deviating from the General Terms and Conditions (hereinafter also referred to as the "**ET Terms**"). These ET Terms and to the extent not covered by the ET Terms, the General Terms and Conditions, shall apply to obligations arising from the provision of the EEZY Trader service. In the event of a conflict between the General Terms and Conditions and the ET Terms, the ET Terms shall prevail.

The operator of the Coingarage platform and service provider is Coingarage s.r.o.

Capitalised abbreviations and terms used in these ET Terms have the meanings specified in the General Terms and Conditions or in the body of the ET Terms. The introduction of an abbreviation or specification of a term is typically indicated in the body of the ET Terms by the words "hereinafter only" or "hereinafter also" in brackets.

1. EEZY Trader

- 1.1 Subject of the ET Conditions. These ET Terms govern the legal relationship arising out of the obligations between us as the operator of the Platform and Website and the provider of the EEZY Trader service on the Platform and you as a user of the Platform or Website and a recipient of the EEZY Trader service on the Platform. In addition to these ET Terms, our mutual obligations are governed by the General Terms and Conditions.
- 1.2 EEZY Trader. The Operator provides the EEZY Trader service on the Platform, which allows you to set up automated trading via the spot market on the Platform based on the parameters you specify (hereinafter also referred to as the "**Bot**"). The Bot you set up will then enter orders to trade on the spot market based on the parameters you select. Trading on the spot market is governed by the Terms of the Spot Market on the Coingarage Platform, which are available via the Website or the Platform.
- 1.3 Premium Trader. In addition to the basic EEZY Trader service, the Platform Operator offers the Premium Trader service, which offers you selected premium features within the Bot settings (hereinafter referred to as the "**Premium Trader**"). The features may be made available to you in particular by unlocking a special section on the Platform or in the Coingarage mobile application or in any other way specified by the Platform Operator. Users with an active Premium Trader service can use the function of automatic copying of trades of other Platform users (hereinafter referred to as the "**Automated Copy Trading**"). Each Automated Copy Trading, i.e. automatically copied trade, will be executed in a volume equal to a percentage of the total amount of free funds you currently hold in your account, in the amount specified in the price list published on the Platform. The Automated Copy Trading feature is not active if you do not have free funds in your account, as defined in Article 2.2 of the ET Terms, of at least the amount currently specified in the price list published on the Platform. The Operator reserves the right to change the scope and terms of the Automated Copy Trading feature, including changing the minimum balance required to activate the feature.

2. EEZY Trader Settings

- 2.1 Sub Account. To create and activate a Bot, you must first create a Sub Account, i.e. a sub-account within your account. To create a Sub Account, you must be a fully authenticated user of the Platform, i.e. you must pass the KYC process.
- 2.2 Resources. In order to create and activate a Bot, you must deposit sufficient funds in the relevant cryptocurrency into the Sub Account in the minimum amount specified by the Platform after creating a Sub Account and paying the subscription fee.
- 2.3 Creating a Bot. In your Sub Account, you have the option to create one or more Bots by entering all or some of the parameters for automated trading, stating that you have sufficient knowledge and understanding of cryptocurrency trading and that you sufficiently understand all of the parameters for setting up the Bot and their interactions. You are fully responsible for setting the Bot parameters and are aware of all risks associated with trading through the Bot and all risks associated with the Bot parameters set by you. The Platform Operator shall not be liable for any loss of cryptoassets or other damage caused by your trading through the Bot.
- 2.4 Starting Bot. After setting the Bot parameters, click the Start Now button to start the Bot immediately. Alternatively, you can click the Start by AI signal button, in which case the Bot will be started automatically based on the Platform's autonomous evaluation, at a time that the Platform determines is optimal for starting the Bot. In the event that you select Start by AI signal, you acknowledge that the Bot will be started automatically only after evaluation by the Platform.

3. Subscriptions and fees

- 3.1 Subscription. In order to create and activate a Bot, you must pay a subscription fee after creating a Sub Account, in the amount and in the manner set out in the offer published on the Platform. Upon payment of the Subscription Fee, you will be allowed to create and use the Bot for the period of time as per the subscription fee selected and paid.
- 3.2 Automatic subscription renewal. If you check the button for automatic subscription renewal, the subscription fee for the same period as the previously selected subscription period shall be automatically paid from your USDT cryptocurrency account at the end of your subscription period. If you do not have a sufficient USDT balance in your account to pay the next subscription fee on the date of automatic renewal, automatic renewal will not occur under this clause. You may cancel the automatic subscription renewal option in the payment settings at any time.
- 3.3 Fees. In addition to the subscription fee, you shall pay the Platform Operator a fee on each profitable trade executed by the Bot, in an amount determined as a percentage of the profit realized on each trade before deduction of spot market trading fees on the Platform (hereinafter also referred to as the "**Success Fee**"). The amount of the Success Fee is set out in the price list published on the Platform. The Success Fee is payable in EEZY Coin cryptocurrency and is automatically debited from your account, which you acknowledge and expressly agree to. In order for the Bot to operate, there must be a sufficient balance of EEZY Coin in your Sub Account, and if there is not a sufficient balance of EEZY Coin in your Sub Account, the Bot will not execute any trades. We reserve the right to set a minimum balance of EEZY Coin to run the Bot.

4. Risks associated with EEZY Trader

- 4.1 Automated command entry. The Bot enters orders for spot trading completely automatically based on the parameters you set without the need for further confirmation from you.
- 4.2 Suitability of the chosen parameters. You should carefully consider the choice of trading strategy and its other parameters, including the timing of the Bot launch. An improperly chosen strategy or other parameters of the Bot may lead to a loss.
- 4.3 No guarantee of profit. There is no universally workable strategy that generates profit in all circumstances. Using a Bot does not guarantee a profit and may result in a loss.
- 4.4 Continuous reassessment of the Bot. You should always monitor the market, continuously evaluate the appropriateness of the Bot's settings, and discontinue the Bot if its settings no longer match the state of the market. If you do not terminate the Bot, it will continue to operate even when the chosen strategy may no longer be appropriate, which may lead to a loss.
- 4.5 Past profits do not guarantee future profits. The fact that a chosen strategy has made a profit in the past does not mean that using it again will make a profit. Similarly, copying the trading of other users does not mean that you will make a profit. The fact that the user whose trading you want to copy has made a profit in the past does not mean that you will make a profit in the future by copying his trading.
- 4.6 Insufficient balance of EEZY coin. If there is insufficient EEZY Coin balance to pay the Success Fee, the relevant order will not be placed, which may result in a loss or prevent the realisation of profit. It is the user's responsibility to maintain a sufficient EEZY coin balance. The Operator shall not be liable for any damages incurred in this regard.
- 4.7 Subscription termination. If the subscription is terminated before the Bot's set strategy is complete, the Bot will be terminated along with the subscription termination and no further orders will be entered. Premature termination of the Bot may result in a loss or unrealized gain. It is the user's responsibility to maintain the subscription for the duration of the Bot. The Operator shall not be liable for any damages incurred in this connection.

5. Final provisions

- 5.1 Withdrawal from the contract within 14 days. In the European Union, consumers have the right to withdraw from online contracts within 14 days of the conclusion of the contract. However, this right is limited in the case of this contractual relationship. Access to the services will be made available at your request immediately after payment of the subscription fee and, even if you subsequently cancel the contract, you will be obliged to pay all fees and the price of the services you have used up to that point.
- 5.2 Language version. These ET Terms are written in Czech and English versions. Any translations into other languages are for informational and non-binding purposes only.
- 5.3 Separability. If individual provisions of these ET Terms become invalid, ineffective or unenforceable, the validity, effectiveness and enforceability of the remaining provisions shall not be affected.

These ET Terms are effective from 1.9.2024
